

BELT FOAM BAR

ADVANTAGES OF FOAM

Increases dwell time

Visual marker for operator

Reduces water and chemical usage

Reduces labor costs

MARKETS SERVED

Institutional

Industrial

Food & Beverage

Transportation

Automotive

SPECIFICATIONS :

Easy cam couple attachment

Stainless steel and poly components

4 ft foam bar length

Use with any Foam-it foam unit

The foam bar is made to cam couple to the belt during sanitation. The hole pattern allows foam to completely cover the belt while it is running. Foam will loosen unwanted soils and make cleaning more efficient. Cleaning belts is time consuming and costly and the Foam Bar offers an easy and affordable solution.
