

# Low Level Alarm

DEMA'S Low Level Alarm is the low level and out of product alarm system that can be used as a stand alone unit with virtually any dispenser or as an integral part of DEMA's Atlas laundry, Titan and Nitro warewash dispensers. It's patent pending touch-less design isolates electronics from chemicals eliminating the potential for chemical attack plus works with all chemistry regardless of conductivity.

Mute button  
deactivates  
audible alarm  
for 5 minutes

Product position  
red LED flashes  
red when out of  
product

Green LED  
signals OK  
product level

Red LED  
signals out  
of product

- Base unit can be used with up to 8 chemicals, can be mounted as a stand alone unit or connected to the Atlas Laundry Dispenser
- Base unit plugs into standard wall outlet or Atlas control board
- Alarm sensor can be mounted anywhere in the chemical line and wires to base unit or to DEMA's warewash dispensers
- Sensor has green and red LED for easy out of product ID in remote chemical storage areas
