

TECHNICAL SUPPORT

FOCUS™ VAPOR STEAMER

What is Continuous Flow Capability?

The Focus™ Vapor Steamer features Continuous Flow Capability, meaning that you don't have to wait for the machine to cool down before you refill the heating kettle.

How To Use It:

While you are steam cleaning with the Focus™ hold down the **PUMP** switch every few minutes for approximately 15 seconds. This allows the Focus™ to continually create new steam.

Troubleshooting

Problem:	Possible Causes:	Solutions:
Water isn't heating or turning to steam.	Too much water in the kettle.	Get some of the water out by switching on the heater and spraying every few minutes to make room for the kettle to produce steam.
